SERVICES:

CCTV SURVEILLANCE

Security guards are important and our systems are often used by security guards to augment their jobs. However, when you have a limited budget, some companies need to decide between security guards or a Digital Video Security system.

Security guards have several advantages, but are often very costly. In addition, consider that compared to our systems a Security Guard:

- * Only has 2 eyes.
- * Can only be in one place at on time.
- * Can not record what they see.
- * Has to sleep.
- * You can not see what he sees remotely.
- * You are not sure they are doing their job while at work.

**WHO'S
WATCHING
THE
GUARDS**

“ This is why many businesses are using a higher percentage of Digital Video Security systems VS. adding security guards so that you can view and record 24/7 with numerous highly reliable cameras. ”

FEATURES:

- Real time monitoring & recording.
- View multiple locations in one screen (centralized monitoring).
- Remote monitoring over the internet.
- View your home, office & factory on mobile phone.
- Upgradable packages & custom designed solutions.
